

# Frontwave Machine – Instable stars

Come close  
Don't stay away that far  
Come closer  
Still closer  
Right from where you are  
And collide with me  
Trust me  
You are not alone

Hold me  
In your gentle arms  
As long we're dancing together  
Round an round in circles  
All around ourselves

**I hear the melody of dark energy  
That tears us apart  
Pulsating disharmony  
Awakes in our hearts  
For we're instable stars**

Come close  
Now my fragile star  
Come closer  
And kiss me  
Suck yourself to me  
And get entwined with me  
Trust me  
You won't dance alone

**I hear the melody of dark energy  
That tears us apart  
Pulsating disharmony  
Awakes in our hearts  
For we're instable stars**

I hear the melody of dark energy  
That tears us apart

For we're instable stars
